

CONTENTS

Introduction	1
LECTURE 1: HYDROLOGIC SYSTEMS	3
The Systems Approach	3
Linear Time-Invariant Systems	17
Identification and Simulation	29
Problems on Hydrologic Systems	39
Literature Cited	40
LECTURE 2: REVIEW OF PHYSICAL HYDROLOGY	43
Precipitation	44
Evaporation and Transpiration	45
Infiltration and Percolation	47
Ground Water Flow	48
Overland Flow and Channel Flow	50
Problems on Physical Hydrology	53
Literature Cited	54
LECTURE 3: REVIEW OF MATHEMATICS	58
Orthogonal Polynomials and Functions	58
Fourier and Laplace Transforms	62
Differential Equations	65
Matrices	67
Numerical Methods	70
Problems on Mathematics	71
Literature Cited	73
LECTURE 4: CLASSICAL METHODS OF RUNOFF PREDICTION	75
The Outflow Hydrograph	75
The Rational Method	79
Unit Hydrograph Concepts	84
Separation of Base Flow	89
Analysis of Complex Storms	93
Problems on Classical Methods	97
Literature Cited	98
LECTURE 5: IDENTIFICATION BASED ON CONTINUOUS DATA	102
Transform Methods of Identification	102
Analysis by Fourier Series	105
Analysis by Fourier and Laplace Transforms	108
Moments and Cumulants	113
Laguerre Analysis of Systems	117
Time-Series Analysis	121
Problems on Identification Based on Continuous Data	124
Literature Cited	125

LECTURE 6: IDENTIFICATION BASED ON DISCRETE DATA	127
Basic System Equations	127
Matrix Methods of Identification	130
Discrete Transform Methods	133
Time-Series Analysis of Discrete Data	138
Computational Methods	141
Problems on Discrete Systems Identification	145
Literature Cited	146
LECTURE 7: SIMULATION OF HYDROLOGIC SYSTEMS	148
Basic Ideas in Simulation	148
Regression Models	151
Digital Simulation	160
Optimization	169
Analog and Physical Models	175
Problems on Simulation	184
Literature Cited	185
LECTURE 8: SYNTHETIC UNIT HYDROGRAPHS	190
Types of Synthetic Unit Hydrographs	190
Time-Area Methods	193
Empirical Expressions for Unit Hydrograph Parameters	200
Empirical Shapes for the Unit Hydrograph	206
Conceptual Models of the Unit Hydrograph	209
Comparison of Methods	216
Problems on Synthetic Unit Hydrographs	224
Literature Cited	227
LECTURE 9: MATHEMATICAL SIMULATION OF SURFACE FLOW	232
Overland Flow	232
Unsteady Flow in Open Channels	243
Problems on Surface Flow	261
Literature Cited	262
LECTURE 10: CONCEPTUAL MODELS OF SUBSURFACE FLOW	267
Movement of Soil Moisture	267
Unsteady Movement of Soil Moisture	272
Comparison of Infiltration Formulas	278
Basic Equations of Ground Water Flow	283
Problems on Subsurface Flow	291
Literature Cited	293
List of Symbols	296
APPENDIX TABLES	300
AUTHOR INDEX	316
SUBJECT INDEX	323
